

SecurSCAN SX618

WALK THROUGH METAL DETECTOR

The SX618 is an extremely **high-performance metal detector** that operates with **18 detection zones**, perfect for people screening at **events** and **gatherings**, and is also suitable for outdoor installations.

It offers the ability to **preset the weight and size of objects to ignore**, such as earrings, buckles, and jewelry, to only signal unwanted items such as electronic devices and **small weapons**.

SX618 is particularly suitable for managing:

- Courts and Prisons
- Government Offices and Barracks
- Examination Locations

MAIN FEATURES

- High sensitivity to magnetic and non-magnetic metals.
- 18 individual detection zones:
 - 6 central zones, 6 right zones, 6 left zones.
- Start & Stop light indication.
- Audible and visual alarms.
- Infrared start/stop function.
- Digital passage counter.
- Lithium batteries for 24 hours of autonomy (opt.)
- Floor supports for installation without drilling (opt.)
- Infrared control remote (opt.)

TECHNICAL SPECIFICATIONS

External dimensions: 220x88x43 cm. (HxWxD)

Passageway dimensions: 200x71 cm. (HxL)

Weight: 20kg.

Power supply: AC90V-240V 50-60Hz

Power consumption: 12W

Operating frequency: 1–50 bands

Operating temperature: -20 to +65°C

Protection rating: IP65
