

## **SecurSCAN TVI 290**

### TELESCOPIC CAMERA FOR SAFETY INSPECTIONS

#### **STANDARD EQUIPMENT**

- Self-balancing camera
- Telescopic rod
- Color LCD monitor
- 2 rechargeable Li-ion batteries of 1800mA (6 hours)
- 220V battery charger
- Shockproof transport case

SecurSCAN TVI 290 is a portable **telescopic self-balancing camera** that allows you to carry out **visual inspections** in difficult to access points. Indispensable as a support for **security checks** by the **Armed Forces, Government Bodies, Private Companies** in sensitive areas at risk of **smuggling** or **security attacks**.

Simple and quick to assemble, TVI 290 is extremely **intuitive** to use, and no operator training is necessary.

Widely used for **undervEHICLE checks** in customs or border areas, it finds wide application in **police inspections** for the control of false ceilings, cavities and wells, in search of potentially dangerous materials.

SecurSCAN TVI 290 also allows **recording of video**, audio and still images directly onto the included SD card.
